

```
1 #Answer1:
2 Altitude=int(input("Enter the
  Altitude: "))
3 if Altitude==1000:
4     print("Safe to land.")
5 elif Altitude<1000:
6     print("Land the plane.")
7 elif 1000<Altitude<5000:
8     print("Come down to 1000ft
  .")
9 elif Altitude>5000:
10    print("Go around and try
  again.")
11 #Answer2:
12 for num in range(1,201):
13     for i in range(2,num):
14         if(num%i==0):
15             break
16         else:
17             print(num)
18             break
```
